

Buffalo Provides AirStation N-Technology 150MBPS Broadband Router & Access Point for Home Users

Buffalo's N-Technology for Easy & Hassle Free Connectivity

New Delhi, April 13, 2010; Buffalo Technology, a global leader in the design, development and manufacturing of wired and wireless networking, storage and memory solutions today announced their Wireless Buffalo AirStation N-Technology Broadband Router & Access Point. The N-Technology Wireless-N 150 Router and Access Point WCR-GN is a powerful entry-level wired and wireless solution, combining Buffalo's high performance technology with an easy and hassle-free install.

"The Buffalo AirStation N-Technology Broadband Router and Access Point is an unbeatable choice for your wireless home network. Simple push button set-up for a great combination of speed and security! This is an ideal router for sharing your Internet connection between the family when viewing files, music, or video and perfect to use when working from home. " said Mr. Susumu Kobayashi, Country Head, Buffalo Technology. The Buffalo AirStation™ N-Technology 150Mbps router uses the latest wireless LAN technology to deliver high speed Internet connections of up to 150Mbps, 3x faster than Wireless-G. Incorporating a built-in 100Mbps 4-Port Router, enabling shared connections between home PC's and is easy to setup with the Buffalo AirStation™ One-Touch Secure System (AOSS™).

Wireless-N Technology extends performance and increases range over Wireless-G. With Wireless connections up to 150Mbps, it also, supports WDS to increase coverage with optional Repeater. 150Mbps is the maximum wireless signal rate derived from IEEE Standard 802.11 specifications. Actual data throughput and range will vary depending upon network conditions and environmental factors, including volume of network traffic, building materials, construction, and network overhead. This is fully compatible with 802.11n/g/b devices from other vendors.

Key Specifications:

- N-Technology provides improved performance and extended range over Wireless-G.
- Wireless connection speed of up to 150Mbps
- Supports WDS to increase coverage with optional Repeater. This is fully compatible with 802.11n/g/b devices from other vendors
- Supports WPA2, WPA-PSK (TKIP, AES) and 128/64-bit WEP Security
- Automatic channel support selects the best available Wireless networking channel
- Easy set-up with AirStation™ One-Touch Secure System (AOSS™) or WPS
- Built-in DHCP Server
- Built-in 4-port 10/100 Auto-Sensing Switch
- Includes NAT and SPI Firewall

Price and Availability

Backed with a 2 years warranty the WCR-GN is available for MRP 3200/-. The product is available in the market with reseller and large format retail outlets.
