

WZR-900DHP

Supports dual band 3x3 for high-speed

Simultaneous 11n/a and 11n/g/b wireless connections

450 Mbps 11n a + **450 Mbps 11n g b**

5GHz **2.4GHz**

This HighPower wireless LAN router supports 802.11n/a and 802.11n/g/b 450-Mbps high-speed transfers.* Such fast connectivity makes full use of fiber optic and other high-speed lines for easy, hassle-free downloading and data-intensive file transfers over the Internet, high-definition video playback, and more.

Expanded coverage and signal range

HighPower and other technologies ensure outstanding signal range and coverage with greater resistance to interference and power to get by physical obstacles for faster, more stable connections. AirStation can also function as an access point for connecting additional devices, or a high-speed wireless bridge linking separate networks and extending your network's range.

Features USB 3.0 Port

USB 3.0 port enables fast and easy transfer of video data and other large files on external hard drives and USB flash drives. You can even connect a USB hard drive as network attached storage, then access the NAS remotely over the Internet through a VPN.

* Actual transfer speeds may vary depending on connector cable, USB peripheral devices, and other environmental factors.
