

RUF3-HSL series

RUF3-HSL Series USB flash memory products feature hardware-based forced data encryption.

All data saved to the flash memory is encrypted, which prevents the data leakage if the drive is ever lost or stolen. There is no need to install any security software, either, so it's easy to use with most any OS.

■ USB 3.0 handles huge amounts of data easily

USB 3.0-supported devices capable of high-speed data transfers can increase your work efficiency tremendously. Using USB 3.0 for the RUF3-HSL Series security functions makes it perfect for business models that involve handling of critical data.

■ AutoRun tool automatically launches authentication screen

The RUF3-HSL includes Buffalo's own AutoRun function that opens password authentication (OPEN_HS.exe) automatically. This calls up the authentication screen, so there is no need to bother clicking to open the authentication screen program every time you need it.

■ No driver installation required

The RUF3-HSL does not require installation of any drivers, regardless of administrator or user permissions.

■ Strong forced hardware encryption

Since any data saved to the RUF3-HSL is force-encrypted, you never need to worry about encryption hassles or forgetting to encrypt the data. Access to the RUF3-HSL also requires password authentication. Even if the drive is ever lost or stolen, the combination of forced encryption and password authentication prevents leakage of your vital data.

■ Password authentication prevents unauthorized access

The RUF3-HSL Series features password-based security to prevent use by third parties. Only those persons who know the password can use the RUF3-HSL, so you can save your data with confidence. After authentication with the password is completed, you can save and edit the files just as you would on an ordinary USB drive.

Features

- USB 3.0 support
- Strong forced encryption function
- Capless design
- Includes strap hole

RUF3-HSL series

Specifications

Drive Capacity

Black	RUF3-HSL4G	4GB
	RUF3-HSL8G	8GB
	RUF3-HSL16G	16GB
	RUF3-HSL32G	32GB

USB Interface

Standard Compliance	USB 2.0 / USB 3.0
Number of Ports	1
Connector Type	USB Type A
Data Transfer Rates	Max. 5 Gbps
