WS5600DNS2

TeraStation™ WS5600DNS2 brings you the power of Windows® Server OS and Intel® Atom™ Dual-Core Processor in a 6-bay form factor. The TeraStation™ WS5600DNS2 is powered by the Microsoft Windows® Storage Server 2012 R2 Standard Edition, providing seamless integration with all Windows® computers and servers.

## ■ Hard drives designed for NAS systems

Especially designed for use in NAS systems, the TeraStation's hard drives feature highly new technologies for highly reliable and stable operation. The drives are also equipped with specialized NAS firmware designed specifically for the extended operation that NAS devises are famous for.

Features
- Reduced power consumption and operating temperatures
- Vibration and noise suppression
- Stable operation and lower operating costs

■ Expand your existing server's storage capacity with iSCSI

The TeraStation™ WSS 5000 R2 Series can be used as an iSCSI storage array, allowing you to expand the storage space of your existing server. Since this can be done through the LAN network, installation location can be flexible.
