

TeraStation

Advantages to Adding a Business-Class "TeraStation" NAS

Does not require any complicated skills

Settings are programmed in the settings screen, so no specialized expertise or experience is needed.

• Screen shot of settings screen

Please click the button for the function you want to use/set.

WebAccess

Enables access to home or office TeraStation through the Internet.

Set Access Restrictions

Set the users and groups allowed access to each individual shared folder.

RAID Settings

Change the hard disk's RAID mode.

Joining Domains

Add the TeraStation to a network with an Active Directory domain.

Features required office functions

BUFFALO offers a complete lineup of products to suit each use, including as file servers, server backups, and more.

These models also include a variety of functions that utilize your previous experience and expertise in NAS systems to share and safeguard data in the office. For more details, refer to "Differences in Functions for Business-Class and Home-Use NAS Products."

• Introduction to some of the functions.

LVM function

Partition disk space and RAID capacity with specific amounts assigned to each department or group.

Active Directory, Access Restrictions

Join domains and set access restrictions for each individual user and group.

Backup function

If the TeraStation fails, connect a backup USB HDD to the computer and read the data from it.

About BUFFALO

www.buffalo-asia.com

BUFFALO Inc., based in Nagoya, Japan, is a leading global provider of award-winning networking, storage and multi-media solutions for the home and small business environments as well as for system builders and integrators. TeraStation

Advantages to Adding a Business-Class "TeraStation" NAS

Virus protection

The Trend Micro NAS Security security™ functions, including virus protection and access restrictions, help protect systems from becoming infected by viruses.

* Planned for Trend Micro NAS Security™ Series.

• Antivirus function

Real-time scan function always scans for viruses as you read and write files.

Alerts are indicated instantly when an infected file is saved.

Access restrictions and access logs act as deterrents to those within the company

Optimal for migrating data from NovaBACKUP

BUFFALO knows the importance of data protection, and our goal is to provide customers with first-class, cost-effective backup solutions. That's why BUFFALO LinkStation™ and TeraStation™ network storage ship bundled with the award-winning NovaBACKUP® data protection software, delivering a comprehensive backup solution for both business and home.

TeraStation units are bundled with 10 licenses of NovaBACKUP Business Essentials, all-inclusive physical and virtual backup* software offered and managed from a single interface.
